

IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

Partnering with AI

in the Workplace

A Forage Job Simulation | Delivered in partnership with Datacom

Mohammad Kashif Saleem Ansari

Roll No. 2410031358 | B.Tech CSE, Section 2CSE 22

Completed August 2026

Mohammad Kashif Saleem

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410031358

Institute

IILM University, Greater Noida, U.P.

Programme

B.Tech CSE, Section 2CSE 22, Batch 2025-26

Internship Domain

AI Collaboration & Prompt Engineering

Duration

Self-Paced Job Simulation | Completed August 2026

Forage & Datacom

Forage hosts free, virtual, industry-designed job simulations built directly with partner companies, allowing students to practise the real tasks an entry-level employee would face before ever applying for a role. For this simulation, Forage partnered with Datacom — a technology services and IT solutions company operating across Australia, New Zealand and the wider Asia-Pacific region — to design a program focused on working alongside AI in a modern technical workplace.

Global Platform

Used by millions of students worldwide to build practical, resume-worthy workplace skills.

Datacom-Designed

Tasks built with Datacom's own teams to mirror genuine day-to-day AI-collaboration work.

Verified Certification

Completion is issued with unique Enrolment and User Verification Codes for authenticity.

Bridging the AI Collaboration Gap

Modern workplaces increasingly rely on AI tools to accelerate research, content creation and software debugging. Yet many early-career professionals have never practised prompting AI effectively, verifying its output, or catching its mistakes — so they either avoid AI altogether or over-trust it without checking. This simulation was built to close exactly that gap.

This internship addressed that gap — practising the full AI-collaboration workflow:

What the Internship Set Out to Achieve

Effective Prompting

Write clear, specific, context-rich prompts that produce reliable AI output.

AI-Assisted Research

Partner with AI to research a topic, structure findings and create a work product.

AI-Powered Debugging

Use AI to identify, explain and fix code errors without introducing new ones.

Verifying AI Output

Judge when AI output can be trusted directly and when it needs correction.

Iterative Refinement

Practise revising a prompt when the first AI response falls short.

Workplace AI Judgement

Gain realistic exposure to how Datacom expects employees to use AI responsibly.

The Toolkit Behind the Internship

AI Chat Assistants

Prompting & drafting

Prompt Engineering

Clarity & context

AI Debugging Tools

Diagnose & fix code

Forage Platform

Task delivery & grading

Fact Verification

Checking AI claims

Documentation Tools

Drafting deliverables

Iterative Refinement

Prompt → review → redo

Human-in-the-Loop

Accountable review

From Prompt to Verified Output

Task Brief

Simulation issues a realistic Datacom scenario and clear deliverable

Prompt Composition

Brief translated into a specific, context-rich AI prompt

AI Generation

AI produces a draft response, suggestion or code fix

Human Review

Output checked for accuracy, relevance and completeness

Refinement

Prompt revised and re-generated where output falls short

Final Submission

Verified deliverable submitted for rubric-based assessment

The Three-Module Learning Journey

1

MODULE

Writing Effective Prompts

Studied clarity, context, constraints and iteration; rewrote vague prompts into precise, task-appropriate ones.

2

MODULE

Partnering with AI to Research, Design & Create

Used AI to research and draft a deliverable, independently verifying key facts before finalising the output.

3

MODULE

Click, Prompt, Fix — AI-Powered Debugging

Used targeted prompts to diagnose a bug, evaluate the AI's proposed fix, and validate the corrected code.

Skills & Capabilities Gained

- ✓ Ability to write focused, context-rich prompts that reliably produce usable AI output
- ✓ Practical experience combining independent judgement with AI assistance in a research task
- ✓ A repeatable four-step approach to AI-assisted debugging: diagnose, explain, fix, verify
- ✓ Greater awareness of AI's limits — knowing when confidence does not guarantee correctness
- ✓ Comfort iterating on prompts rather than accepting an incomplete first draft
- ✓ A completed, independently verifiable certificate of completion from Forage and Datacom

CERTIFICATION

Successfully Completed

Status

Certificate of Completion

Enrolment Verification Code

future professionals

kashif saleem

Partnering with AI in the workplace Job Simulation

Certificate of Completion
August 31st, 2026

Over the period of August 2026, kashif saleem has completed practical tasks in:

Writing effective prompts
Partnering with AI to research, design and create
Click, prompt, fix: Your first steps into AI-powered debugging

Tom Brunskill
Co-Founder of Forage

Enrolment Verification Code 6a9507242b27748900a0276d | User Verification Code 6a9506ad975682cf622b56cd | Issued by Forage

Thank You
